

# FLU VACCINATION

# 2025

## DON'T LET THE FLU BUG YOU - ARM YOURSELF IN 2025

In 2024 Australia had the worst flu season on record with over 352,000 laboratory-confirmed cases, eclipsing the previous high of 313,615 cases in 2019. In contrast, there were about 540,000 less vaccinations given in 2024 than in 2023. This serves as a reminder to take proactive measures and get your flu vaccinations in early during 2025.

Vaccination is the best way to reduce the risk of getting the flu and its possible complications. Being vaccinated builds immunity to the virus and helps prevent transmission of the virus to others.

The 2025 Quadrivalent Flu Vaccination protects against 4 strains including 2A strains and 2B strains indicated by research as most likely to spread and cause illness among Australians during the upcoming flu season.

*\* Fee is for metropolitan locations between 6am and 6pm. Minimum cost per work site visit is \$270 plus GST. Additional fees apply for country and regional locations and bookings outside standard hours.*

*† Time onsite is based on an average of 25 vaccinations per hour.*

# \$27

+ GST pp\*

includes vaccine,  
nurse's time, travel  
within the metropolitan  
area and a FREE  
LOLLYPOP!
